Quality and Accreditation Unit-ABET Center

Computer Engineering Program Employer Survey results 2014

Introduction

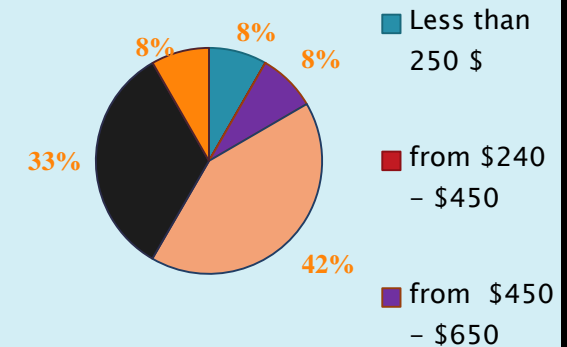

The Quality and Accreditation Unit (ABET centre) launched the Employer Survey 2014 online in February 2014. The survey has targeted the employers of the Computer Engineering Program locally and abroad to assess and improve the quality of the educational programs, and to involve them with the reviewing process of the Program Educational Objectives, and taking feedback from them about our alumni.

Executive summary

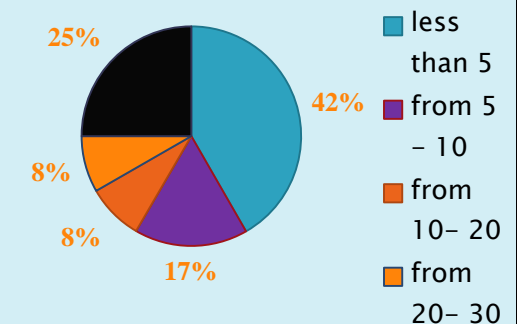

A total number of 13 employers responded to the survey, 12 of whom were Employers of the Computer Engineering Program. Most of the respondents are employers in non-governmental organizations, also more than half of the organizations have less than 100 employees.

The employers indicated that they are satisfied with the newly rephrased Computer Engineering Program Educational Objectives (PEOs).
